

Environmental Policy

SPB Plant & Tool Hire Ltd cares for the environment in all its forms and recognises that concern for the environment should be an integral and fundamental part of the business.

The company is aware of the effects its activities may have upon the environment: its objective is to balance the need to minimise any adverse effects our operation may have upon both the local and global environment.

In particular the company will seek to:

- Comply with, or exceed the requirements of relevant environmental legislation and industry codes of practise
- Reduce raw material and resource consumption, minimise waste, re-use rather than dispose and promote recycling
- Educate and train all employees in the application of this policy
- Recognise and take action with regard to concerns of interested parties such as suppliers, clients, regulators, public and shareholder
- Work with suppliers and clients to minimise environmental impacts
- Make available appropriate resources to implement this policy effectively

The company will, upon request, provide interested parties with copies of this policy.

S Barrett
